

## Request:

The City of Livingston (City) is requesting \$ 6,500,000 to design and construct the improvements for the Winton Parkway Extension Project.

## Description:

The City of Livingston is striving to attract new commercial and industrial businesses and increase job opportunities in the City. Livingston has identified the Winton Parkway corridor as a vital part of its development strategy. The Winton Parkway Extension Project is one component that focuses on the removal of gaps in the corridor's transportation infrastructure.

The City's proposed project consists of roadway improvements that will include a 4 lane parkway with a median and bike and pedestrian facilities between B Street and F Street. Livingston also proposes to construct ramp improvements at the Winton Parkway and State Route 99 interchange.

## Necessity:

- Increase local and highway access to the growing Workplace District identified in the 2013 Citywide Plan. The District includes professional, medical, service, commercial, and industrial facilities
- Increase citywide economic development and growth
- Provide a link to local healthcare and medical training facility
- Provide connectivity between residential neighborhoods, the Workplace District, and the State Route 99 corridor
- Remove the gap in Livingston's existing transportation infrastructure
- Create a transportation corridor featuring both motorized and non-motorized improvements
- Reduce the consumption of non-renewable natural resources

## Beneficiaries:

- City of Livingston Residents and Businesses
- Highway Travelers
- Commerce and Goods Transportation
